

We have recently taken delivery of the Matchless water unions (o/e part no. RE.306). These are for the MX barrels and heads and the MX4 barrels. We have had half of the batch made with circular flanges as original for the purists, but they are very difficult to remove and hard to install without damaging them. The others have been made to an improved design with a hexagonal flange for easier installation and removal and have a 42 mm AF hexagon which is a standard spanner size. They are mild steel with BZP finish (bright zinc plated). We also have the correct size copper washers (1.5" bore) if you would like to use them on the mating faces.

RE.306 circular flange are £11.06 each (+VAT)
order from Roger Orford, Matchless sales
RE.306/1 hexagonal flange are £16.32 each
(+VAT) (as above)

Other new parts in progress: The clutch driving plates / starter ring gears (R.258) are now away for heat treatment and should be available from Bob Derricott in January. Early in the new year we also expect to take delivery of the following items which are new to us, all nearing completion and then going for heat treatment.

R38 propshaft dog coupling: R40 Tail end shaft (rear propshaft)
R128 gearbox layshaft spindle: 2 speeder dog clutch (sliding dog)

Here's wishing you a great Christmas and a Happy New Year.

Steve Hughes
on behalf of the Mogspares team.

For Sale: Supercharged BMW-powered racing three-wheeler. 980 cc twin graded as 1972. Rear engine, Morgan style spine chassis. Reinforced Mini front end. Wood and aluminium bodywork. Shorrock supercharger rebuilt and modified by Derek Chinn Precision Engineers. 16 psi boost at 1.4 x engine speed. Tremendous torque. Can be demonstrated running. My age (86) forces very reluctant sale. More info on request. Total cost about £10,000 but I will accept lower offers for this exceptional machine. Malcolm Cookson. 01229 823279
