

Hello everyone. We have just a couple of new small items to announce this month which we have received into stock in time for the AGM Spares Fair

For Matchless MX2 and MX4

MM.RE.163/PE Pushrod cover tube bottom sealing rings. Made in high density closed cell foam (used in prosthetic limbs!) £1.50 each (+VAT) from Eric Atkinson (4 per engine set)

MM.RE.165 Pushrod cover tube centre sealing washer (cork) recently in stock with Eric.

For all 3-speeder twins and F types

MT.GB-R.113 Yoke end lock nuts for gear selector rods. These are 3/8" BSF half nuts which are getting hard to find and often expensive! 50p each (+VAT) from Bob Derricott (2 per car set)

We need to replenish our stocks of various parts which require checking of old designs, modelling and redrawing. We then order JAP KTW and Matchless MX valve guides (MM.RE.253), Matchless front mainshafts (MM.RE.61) and rear mainshafts (two types). For 2-speeders, so as to give you the option to select optimum gearing to match the engine torque and power of your car to your regular driving conditions we will shortly be placing orders for a small batch of 13T low gear dog sprockets and 30T high gear plate sprockets (both B and M/C types) to supplement our existing range.

Mogshop

Charles Smith will have had a demonstration of the new online Mogshop at the Spares Fair which we hope to launch fully before the year end. It is still at "beta" level and not accessible to anyone, but our Australian member Mike Ognensis has successfully used it to place an order for JAP parts! We have no idea how he has managed to do this but he will forever hold the honour of being the first member to do so!

Steve Hughes, on behalf of the Mogspares team.

A Lone Letter to the Editor

Dear Julian,

The front cover of the July *Bulletin* shows a M3W with the cam cover removed with what looks like a piece of dowel in the cam, but no explanation in the magazine. As mine has suffered a cam failure and now a cam belt replacement, I would be interested to know why?

Kind Regards,
Roger Broomfield, 11544.
