Mogspares Recruitment

New Mogspares Transmissions Sales Officer (Drive Line) - Urgently Needed.

Bob Derricott was on top form for the Opening Run but unfortunately the next day he became unwell and has been in hospital since then. I'm pleased to report that he is now getting fitter and may be able to return home but he will not be well enough to continue as the Mogspares Transmissions Sales Officer.

For the last 21 years, Bob's service to members has been second to none, and Transmissions Sales has grown into the busiest sales section. To make the role manageable, we are splitting Transmissions into Chassis (suspension, steering, cables and brakes) and Drive Line (2 speeder gears, 3 speeder gears, clutch & prop shafts). Tony Pearson (currently Ford Sales officer) has kindly agreed to take on Chassis sales so we need a new Drive Line sales officer. If you have visited the Mogshop recently you will see that we've already started the split.

This is a wonderful opportunity to be part of a very active team. You will get to understand the challenges and rewards of reengineering HFS' Morgan parts, you will get to make new friends in the club and be a very important part in keeping our cars on the road.

Candidates for the role should have some experience of the parts to be sold and a secure location for storing the stock. We are looking for someone with an organised mind and a good communicator. Training will be provided by the Mogspares Coordinator and other members of the Mogspares team.

Please contact the Mogspares Coordinator or any of the current sales officers to know more.
